

SHIPXPEED API Documentation

1. Create Shipment

URL: <https://shipxpeed.com/api/shipments/create>

Instructions:

- Use this endpoint to create a new shipment order.
- Ensure all required fields are included and properly formatted.
- Nested fields like 'consignee', 'pickup', and 'rto' must contain accurate address details.
- Set 'unique_order_number' to "yes" to prevent duplication.
- 'seller_id' must be included as it identifies the merchant.

Request Format (POST):

- consignee: { name, phone, address, address_2, pincode, city, state }
- order_number: "#5588"
- unique_order_number: "yes"
- payment_type: "cod"
- order_items: [{ name, sku, qty, price }]
- collectable_amount: "100"
- pickup: { warehouse_name, name, address, address_2, pincode, city, state, phone }
- package_weight: "100"
- package_length: "10"
- package_breadth: "10"
- package_height: "10"
- is_rto_different: "no"
- rto: { warehouse_name, name, address, city, state, pincode, phone }
- request_auto_pickup: "yes"
- courier_id: null
- seller_id: [expected from client]

Response (success):

```
{ "success": true, "message": "Shipment created successfully", "order_id": 465 }
```

2. Track Order

URL: <https://shipxpeed.com/api/orders/track>

Instructions:

- This endpoint allows tracking of a shipment using the AWB number.
- The response structure may vary depending on the courier and shipment status.
- Always ensure the AWB is correct and exists before calling.

Request Format (GET):

- awb: "38528410001923"

Multiple Possible Responses:

1. Basic Shipment Info:

Includes fields like: id, order_id, order_number, created, awb_number, courier_id, warehouse_id, status, etc.

2. Pickup Request Info:

Includes: client_order_number, request_type, price, address, skus, seller, status updates, pickup_request_state_histories, etc.

3. Detailed Shipment Info:

Includes: AWB, CODAmount, Consignee, DeliveryDate, Origin, Destination, PickupLocation, PromisedDeliveryDate, Quantity, Scans, SenderName, and Status details (StatusCode, StatusType, DateTime, Location, etc.)
